Lake Manyara is nestled at the bottom of the Great Rift Valley and for a national park only 330 sq km, of which up to 200 sq km is the lake it is the perfect introduction to a variety of habitats, ecosystems and wildlife. The various habitats of lush forests, acacia woodlands, grassy floodplain and volcanic peaks are home to prey and predators large and small as well as over 400 species of birds! After our game drive, we head up the Great Rift Valley to absorb the stunning vista that lies before us from our lodge. DAY 3 - Game drives in the Serengeti National Park

Today we have a long but rewarding journey into the world famous Serengeti National Park. The scenery and views are spectacular as we traverse the Ngorongoro Crater and transit through the Ngorongoro Conservation Area. We pass several Masai homesteads before arriving at Olduvai Gorge, where in 1959, anthropologists Dr and Mrs Leakey discovered the remains of an almost intact human skull named 'Nutcracker Man'. It was here at this important prehistoric site, together with other startling discoveries, that have contributed to the furthering understanding of early human development. Olduvai Gorge and the fossils that it contains give a unique insight into the way that this part of the world has changed and humans with it. Accompanied by a local guide we visit Olduvai Gorge visitor centre and museum to learn more of this fascinating place and its secrets. Later today we will enter the Serengeti at Naabi Hill Gate. Serengeti is the Masai name that means the 'endless grass plains' and it is through these plains interspersed with granite outcrops that we travel to our lodge. Once in the Serengeti we'll move slowly through the park, keeping a close eye out for game as we head to the central Seronera area.

Accommodation: Serengeti Kati Kati (or similar)

Standard Tented Camp

DAY 4 - Game viewing in the Serengeti National Park

The Serengeti covers almost 15,000 square km in area and is Tanzania's oldest, and arguably, greatest park. Famed for the awe-inspiring spectacle of the annual migration, it offers some of the best game viewing in Africa. While we are here we shall move through various different habitats and seek out the daily drama of the struggle between prey and predator, large and small, from the lions, leopards and cheetahs to the elephants, giraffe and buffalo. Every turn of the game drives reveal something of this stunning world where more than 500 species of birds recorded here. The vastness of the space under the vault of the sky gives one a liberating sense of space difficult to find anywhere else.

DAY 5 - To Ngorongoro Conservation area and Karatu

We'll make one last early morning game drive as we retrace our route back to Naabi Hill and into the Ngorongoro Conservation Area. We will pass various Masai settlements en route. We then head to the Karatu area where we will stay in a lodge built in the traditional style of an old colonial style farmhouse and nestled in the grounds of a coffee plantation.

DAY 6 - In Ngorongoro Crater; return to Karatu

Today we head back to the crater where we descend from the upper rim, driving down a steep track that drops about a staggering 600m to the grassy plain, lake and marshes of the basin floor below. This winding track is restricted to small 4WD vehicles. Among the animals to watch out for are elephant, lion, cheetah, buffalo and rhino. The perennial marshes teem with birdlife. The crater itself, technically classed as a caldera, owes its existence to the violent fracturing of the Rift Valley over a period of some 15 million years. At one time a volcano occupied this spot that then became extinct and collapsed into the empty magma chamber beneath it leaving only the gigantic natural basin which is now considered a veritable 'Garden of Eden'. After our half day game drive in the crater today, we return to our lodge in Karatu.

Accommodation: Ngorongoro Farm House (or similar)

DAY 7 - Drive to Tarangire National Park; Afternoon Game Drive

This morning we drive to Tarangire National Park. It derives its name from the Tarangire River that flows through the length of the park. One of the most striking features of the park are the majestic old baobab trees with massive silvery trunks and gourd-like fruit that dominate the skyline. Tarangire has the greatest concentration of wildlife outside of the Serengeti ecosystem and is part of a larger ecosystem that extends further south into the Masai steppes. The permanent water sources of the park attract large herds of elephants and other herbivores to them. The park is home to the shy fringed eared oryx and the gerenuk antelope not seen in other parks. Today we will enjoy an afternoon game drive and then relax and enjoy the wonderful location and views over the escarpment.

Accommodation: Lake Burunge Tented Camp (or similar)
