**Climate**

As Vietnam is a long, narrow country from north to south climate conditions vary considerably. The climate can be divided into three distinct patterns between the north, central and south regions. The climate in the north is generally humid and subtropical, although the winter months from November to March can be colder with temperatures from 10 - 15 degrees. Summer months, May to September can be quite hot with temperatures from 30 - 35 degrees. Meanwhile south Vietnam enjoys a tropical climate all year round, with little variation throughout the year (around 27 - 32 degrees), however May to November is the rainy season when short, heavy downpours are quite frequent. Central Vietnam lies somewhere in between. The coastal strip is usually dry and hotter from April to October while November to March is wetter and cooler. A light rain jacket and small umbrella are recommended year round.
