Tanzania

Climate

The climate is tropical but varies greatly with altitude. Coastal areas and islands are hot and humid, while the central plateau is dry and arid. Tanzania can be visited all year round and its seasons can be defined as green and dry. The dry season is generally from June to October and January to February, with most days being fine and sunny weather with temperatures and humidity rising throughout the day. It can be cold at night, particularly in June & July. The green season includes the rains of March to May (with the peak in April – generally during the afternoon) and November to early December. This pattern can be unpredictable. The weather system during these periods refreshes the landscape creating lush green scenery which is not witnessed during the dry season. The Zanzibar archipelago is a year-round destination but does have dry and rainy seasons. The dry season is between June to October and January to February. The 'short rains' are between November to December, when a short, afternoon rainstorm can be a daily occurrence. The 'long rains' occur between March to May, when days can be humid and rainy, however, sunshine is still often frequent. The changing weather patterns does mean the 'rainy' season is becoming less predictable. Weather at altitude can vary to the above seasons, with the evenings being cold. Kilimanjaro features its own array of climates and biomes; between 1,800 to 2,800 metres is a rainforest climate (humid and hot), from 2,800 to 4,000 metres is dry mountain vegetation – please note night time temperatures can fall to below 0 degrees from this level. A cold desert climate with a strong equatorial sun during the day but cold nights is found between 4,000 to 5,000 metres. The summit generally has clear days though the evenings can be very cold featuring snow. Additional information and climate charts can be accessed at <http://www.explore.co.uk/weather>. Seasonal weather patterns can be unpredictable. Up-to-date information on the weather worldwide can be found by following the BBC weather link on this page.
